GREAT IMPROVEMENT IN DENTIS-The attention of the public is called to a great discovery in Dentistry.

THE GREATEST ADVANCE STEP EVER
MADE IN THE ART.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and add to this the aumoyance of food getting under the plate while cating. I have discoverged a method of so constructing the plate on which the teeth are set that they will not start at drop while cating or speaking, neither will any particles of food get under the plate, no matter what the condition of the mouth is. matter what the condition of the mouth is, chich is not true of any method lathertoused.
